User manual

- To turn on the work lamp and start to use a preset mode, you can press the desired button directly, without using the ON/OFF button. However, to turn off the work lamp manually, you must press the ON/OFF button.
- To change the brightness when using a preset mode, simply drag your finger over the dimmer to the right or left (does not apply for night light mode).
- 3. You can also press the ON/OFF button to turn the work lamp on and then use the dimmer to adjust the brightness.
- 4. The work lamp has a memory function, which means that light colour and brightness are the same the next time you turn it on.
- If you want to set a 30-minute timer without needing to keep an eye on a clock you can press the timer button. It will then slowly flash three times to indicate that the countdown has started or ended.
- If you want the work lamp to automatically turn off when the night light mode is active, press the timer button and it will turn off in 30 minutes.
